

Polymerized Rosin Modified Resin

Product Description:

The Polymerized Rosin Modified Resin is a yellow translucent solid which is a further processed product from polymerized rosin

Product applications: Various types of adhesives

Product features: High softening point, high adhesion stress, high peeling strength, excellent compatibility

| Name | AV (mgKOH/g) | Color (Gardener) | Softening Point(°C) |
|-----------|--------------|------------------|---------------------|
| PRE-12510 | ≤25 | ≤11 | 120 ~ 130 |
| PRE-13510 | ≤25 | ≤11 | 130 ~ 140 |
| PR-1510 | ≤25 | ≤10 | 145 ~ 155 |
| PR-1610 | ≤25 | ≤10 | 155 ~ 165 |
| PR-1710 | ≤25 | ≤11 | 165 ~ 175 |

Packing Specifications:

- 25kg paper bag
- 500kg regular container bag
- 500kg Type-C container bag
- Customized packaging depends on customer needs
